## SUMMARY

I'm a Software Developer specializing in Java and Spring, with fullstack experience building web applications. I work across backend logic, SQL databases, and JSP/HTML/CSS/JavaScript on the frontend. I enjoy solving technical problems, designing workflow logic, and writing maintainable code that's easy for other developers to follow. I learn new tools quickly and can move between backend and frontend depending on what the project needs.

## EDUCATION

**SMK Negeri 2 Surabaya**

Jun 2015 – Jun 2018

Vocational High School Diploma, Computer Software Engineering

## EXPERIENCE

**Application Development Team Lead**

Jan 2025 – Present | Jakarta, Indonesia

D'ROSE CONSULTING

- Led development of workflow-based applications on Intramart supporting daily business operations.
- Gathered requirements and translated business needs into workflow logic, technical specs, and timelines.
- Documented workflow specifications and UAT materials for business and QA teams.
- Delegated tasks, conducted code reviews, and planned releases to maintain code quality and schedules.
- Developed backend modules in Java, Spring MVC, JSP, and SQL across multiple workflows.
- Collaborated with business stakeholders to resolve issues and support testing and deployment.

**Senior Application Developer**

Oct 2021 – Jan 2025 | Jakarta, Indonesia

D'ROSE CONSULTING

- Built workflow-driven enterprise applications on Intramart using Java, JSP, HTML/CSS, and JavaScript.
- Designed SQL queries, schema structures, and stored procedures for PostgreSQL and SQL Server.
- Implemented backend logic, integration components, and performance enhancements.
- Worked closely with teammates to improve workflows, code quality, and system performance.

**Senior Team Lead**

Apr 2019 – Mar 2021 | Surabaya, Indonesia

CV. Berkah Multisarana

- Managed customer interactions across WhatsApp, Tawk.to, Instagram, Telegram, and Shopee.
- Developed and maintained the company website to support product information and sales.
- Designed banners, menus, and visuals for web and app interfaces to improve engagement.
- Supervised a small operational team, ensuring task completion, performance reporting, and coordination across sales activities.

## SKILLS

Java	Python	PHP	Spring MVC	Spring Boot	REST APIs	PostgreSQL
Microsoft SQL Server	Version Control (Git)	JSP	HTML/CSS	JavaScript		
Microsoft Power BI	SDLC Documentation	Fullstack Development
